NOTE:

- 1. The gold fire assay is conducted following the standardized reference utilized by assay laboratories globally for the purpose of hallmarking.
- 2. The indicated fineness of the precious metal content serves as a reference only and is not officially certified for any hallmarking purposes.
- 3. We shall not assume any legal liability for discrepancies identified.
- 4. We strongly encourage customer to take back their sample left as soon as possible.
- 5. We shall not assume any legal liability for any loss, damage, or theft of samples left.
